In 1996, AT&T spun-off its communications equipment division as well as associated Bell Labs research assets into Lucent Technologies. Lucent and Alcatel merged in 2006 to become Alcatel-Lucent. As a result of this transaction, LGS Innovations LLC was established to be Alcatel-Lucent's sole sales and contracting channel for all classified and unclassified business contracted with the U.S. Federal Government. A wholly-owned subsidiary of Alcatel-Lucent, LGS Innovations retained the Government Communications Lab portion of Bell Labs. LGS Innovations operates under a Special Security Agreement with the U.S. Government. The U.S. Federal Government turns to LGS Innovations to research, develop and deploy networking solutions for its missions around the world, trusting LGS Innovations to address its most challenging communications needs. Building on its Bell Labs heritage and leveraging the expertise of Alcatel-Lucent, a worldwide leader in fixed, mobile and converged broadband networking, LGS Innovations delivers groundbreaking research and advanced communications solutions and services that enhance the government's ability to quickly and securely send and receive information, providing an information advantage and contributing to mission success. LGS Innovations is headquartered in Herndon, Virginia, USA. LGS Innovations: The Network Experts.TM
